## Notations of selected objects in D2000 CNF

This functionality of the selection window allows to view, simply and easy, the notations of selected object in ESL scripts (available only for objects of *Event* and *Picture* type).

By clicking on the list of objects by right mouse button the menu will occur. The item Extended actions contains another item **Notations**. Clicking on this item opens the window containing the list of notations:

Notation X					
		Script	Туре	Notation	
	1	E.Archive_Test: 38	TODO	plnenie arch hodnot	
	2	E.Archive_Test: 85	FIXME	prepocet hodnot	
	3	E.TestCNT: 33	TODO	prečítanie hodnoty z kontajnera	
					<u>C</u> ancel

The list may be sort by clicking on the required column name.

For objects of Event type: doubleclick on the selected notation opens the specific script.
