

# Use the Buttons in the Toolbar

## Using the buttons in the toolbar

D2000 HTML help viewer can consist the following buttons:

- **Hide/Show** opens/closes Navigation pane.
- **Locate** synchronizes the displayed topic with the selected heading in the table of contents.
- **Back** displays the previous topic listed in the table of contents.
- **Forward** displays the next topic listed in the table of contents.
- **Stop** stops downloading file information. Click the button to stop a Web page downloading.
- **Refresh** updates Web contents that is currently displayed in Topic pane.
- **Home** displays the title page of the corresponding help file.
- **Print** opens the dialog box to print.
- **Options** opens the menu defined by the help file author.

## Note

- The toolbar in your Help Viewer may not contain all of these navigational buttons. Its appearance depends on help file configuration.
