None

Popis

Function append value to JSON array. Supported types are INT, REAL, BOOL and TEXT. If you want to append TIME type, you have to first convert it to TEXT type.

Exception is thrown if you try to append unsupported type, or if provided invalid handle to JSON array.

Príklad

```
INT _arr  
_arr := %JSON_CreateArray()  
  
%JSON_ArrayAppendValue(_arr, "IPESOFT")  
%JSON_ArrayAppendValue(_arr, 365)  
%JSON_ArrayAppendValue(_arr, 1.234)  
%JSON_ArrayAppendValue(_arr, @TRUE)  
%JSON_ArrayAppendValue(_arr, U.uservariable)  
  
%JSON_FreeArrayHandle(_arr)
```
