JSON_ObjectClear

%JSON_ObjectClear function

Function

Clear JSON object.

Declaration

```
%JSON_ObjectClear(
    INT in handle
 )
```

Parameters

handle	Handle to JSON object.

Return value

None

Description

Function removes all fields from JSON object.

Exception is thrown if handle to object is invalid.

Example

```
INT _obj
_obj := %JSON_ObjectFromString('{"name":"Jon","surname":"English"}')

%JSON_ObjectClear(_obj)

%JSON_FreeObjectHandle(_obj)
```
