On-line help settings

On-line help for development of D2000 application in Java contains a description of Java classes. The files are placed in subdirectory **Java** in D2000 installation directory. The installation of on-line help is following:

1. Open Eclipse project for D2000 application and right-click on d2sybase. Choose an item Properties.

2. A dialog window open to set a path to the directory which contains the help files (parameter **Javadoc location path**). Click on button **Validate** to validate.

Properties for d2sysbase					
type filter text	Javadoc Location		⇔ ▼ ⇔ ▼ ▼		
Resource Java Source Attachment	Specify the location (URL) of the documentation generated by Javadoc. The Javadoc location will contain a file called 'package-list'.				
Javadoc Location Native Library	Iavadoc URL (e.g. 'http://www.sample-url.org/doc/' or 'file:/c:/myworkspace/myproject/doc')				
Run/Debug Settings	Javadoc location path:	file:/D:/D2000/D2000.EXE/Help/java/	Browse		
			<u>V</u> alidate		
	Javadoc in archive				
		External file Workspace file			
	Archive <u>p</u> ath:		<u>B</u> rowse		
	Path <u>w</u> ithin archive:		Br <u>o</u> wse		
			Validate		
			Restore <u>D</u> efaults <u>Apply</u>		
?			OK Cancel		

3. Then click on OK. The on-line help is installed.

Usage

The help to Java classes/methods opens when you move a mouse pointer on the method and press F1. There is a cross-reference to the file in the right part.

Java as a script language
