TraceBufferASCIIFile

Declaration

```
void (_stdcall * TraceBufferASCIIFile)(HOBJ LnID, char *FileName, unsigned
int MaxFileSize, void *Data, unsigned int Len);
```

Parameters

LnId	Line ID.
FileName	File name.
MaxFileSize	Maximal size of log file.
Data	Pointer to a buffer with data to be saved.
Len	Number of bytes to be saved.

Description

This procedure enables to save the received or sent data as ASCII code into the log file that is defined by *FileName* parameter. The files are saved to the Trace directory of an application.
