

ExitProc

Declaration

```
void _stdcall ExitProc(void)
```

Description

ExitProc (_ExitProc@0 in Stdcall convention) is called before stopping the process [D2000 KOM](#) (stopping the process **D2000 KOM** by user, stopping the [D2000 Server](#)). The function handle should be as quick as possible. You should realize that D2000 System may not be functioning and any use of [call-back functions](#) could be incorrect.
