

DeleteEl

DeleteEl

Declaration

```
void (_stdcall *DeleteEl)(LinListH List, void *DataPtr, void *FindProc);
```

Parameters

List	Handle to a linked list.
DataPtr	Address to the data, which are to be deleted. The data are to be sent as El1 into the search function.
FindProc	Search function address. The format of the function is equal to the sort function of the calling InsertEl . The item was found and deleted when the search function returns the value of zero.

Description

The function deletes the defined item in the list.
