HI_GetTextLimit

%HI_GetTextLimit, %HI_SetTextLimit functions

Function

The function **%HI_SetTextLimit** sets the maximum number of characters to enter in Windows control of Text entry field or List box types (control function).

The function **%HI_GetTextLimit** retrieves the maximum number of characters to enter in Windows control of Text entry field or List box types.

Declaration

```
%HI_SetTextLimit(
   INT in refId,
   INT in maxNrChars,
 )

 IN INT %HI_GetTextLimit(
   INT in refId
 )
```

Parameters

refId	Reference to Windows control of Text entry field or List box types (reference variable).
maxNrChars	Maximum number of characters to enter.

Note

The parameter Type in the configuration of Windows control of List box must be set to the value of *Drop down combo*, otherwise the function returns the value of 0.
