HI_EditItem

%HI_EditItem function

Function

The function **%HI_EditItem** switches the specified item of the displayer of Browser type to the editing mode (control function). The editing mode must be enabled in displayer.

Declaration

```
%HI_EditItem(
   INT in refId,
   INT in row,
   INT in  col
 )
```

Parameters

refId	Reference to graphic object (`reference variable`).
row	Item row.
col	Item column.

Note

The parameters *row* and *col* define the row and the column of the item. Their values can be within the range of 1 ... .

Example

```
; start the editing of the item placed in 3rd row and 2nd column
```

```
%HI_EditItem(_refId, 3, 2)
```

Note

If the defined row is not on the current page, or the column is hidden, the function has no effect.
