HI_SetGraphTick

%HI_SetGraphTick function

|	
Old name	%HI_SetDiaTrendTick
Function	The function **%HI_SetGraphTick** sets the distance among ticks on the time axis of the graph connected to the displayer of Graph type (Control function).
| **Declaration** | ```
%HI_SetGraphTick(
    INT in refId,
    INT in extraTick,
    INT in majorTick,
    INT in minorTick
 )
``` |

Parameters

refId	Reference to a displayer (reference variable).
extraTick	Distance between two extra ticks [s] (see the figure above).
majorTick	Distance between two major ticks [s] (see the figure above).
minorTick	Distance between two minor ticks [s] (see the figure above).

Description

Time distance among ticks is given in seconds. There can be defined three types of ticks. The situation is shown in the following figure:

The following condition must be valid: extraTick majorTick minorTick.
