

HI_ReportTimPar

%HI_ReportTimPar function

Function

The function **%HI_ReportTimPar** sets the time parameters of the displayer of Report type ([Control function](#)).

Declaration

```
%HI_ReportTimPar(  
    INT in refId,  
    TIME in param1,  
    TIME in param2  
)
```

Parameters

refId	Reference to graphic object (reference variable).
param1	Time parameter.
param2	Time parameter.

Description

The function sets two time parameters of the report given by the reference variable *refId*.

Note

The report parameters can be also defined by right-clicking the report and select the item **Parameters**. In the displayed dialog box set required values and click the button **OK**.

For detailed description of the report parameters see the topics [D2000 WorkBook](#), [CrystalReport](#).
