

# HI\_SetBrowserAutoRefresh

## %HI\_SetBrowserAutoRefresh, %HI\_GetBrowserAutoRefresh functions

Function

The function **%HI\_SetBrowserAutoRefresh** enables/disables auto refresh in displayer of [Browser](#) type (control function), if the object [Table](#) is connected to it.

Declaration

```
%HI_SetBrowserAutoRefresh(  
    INT in refId,  
    BOOL in autorefresh  
)  
  
BOOL %HI_GetBrowserAutoRefresh(  
    INT in refId  
)
```

Parameters

refid	Reference to displayer ( <a href="#">reference variable</a> ).
autorefresh	The value of displayer. TRUE - auto refresh enabled, FALSE - auto refresh disabled.

Note

It relates only to **Browser** displayer with the connected **Table**.
