

# Picture Information (Work with D2000 HI)

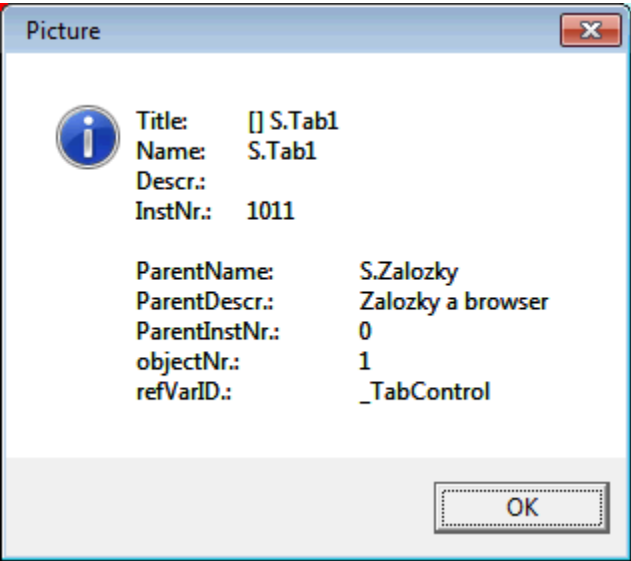

## Picture information

Pressing the button CTRL+SHIFT and right-mouse button above a picture opens the information dialog box that displays basic information on the picture. The information is for D2000 system application developers.

<b>Title</b>	Picture window title (title may be defined by the function %HI_SetPictureTitle).
<b>Name</b>	Picture name.
<b>Descr.</b>	Picture description.
<b>InstNr.</b>	Instance number.

The subpicture of picture contains in addition to basic information also the information about parent picture.

<b>ParentName</b>	Name of parent picture, in which other picture is placed.
<b>ParentDescr.</b>	Description of parent picture, in which other picture is placed.
<b>ParentInstNr.</b>	Instance number of parent picture, in which other picture is placed.
<b>ObjectNr.</b>	Object number of parent picture, in which other picture is placed.
<b>refVarID</b>	Name of reference variable of graphic object from parent picture, in which other picture is placed.

**Note:** After the information window with the information on picture is opened, the picture name is automatically inserted into the clipboard.
