

Using the D2000 HTML Help Viewer (HI)

Using the D2000 HTML help viewer

By default, when you build a help system, your compiled help file (.chm) will appear in a window with three panes:

- On the left side of the window is **Navigation pane**. It contains four navigational tabs: **Contents** tab, **Index** tab, **Search** tab and **Favorites** tab.
- On the right side of the window is the **Topic pane**. It displays the selected help topic, or the default help topic.
- The third pane is the toolbar, which is located below the help window title bar. Toolbar is placed below the window title and it contains several [buttons](#).
