

IsArchUnBlock

IsArchUnBlock function

Function

The function returns TRUE, if the particular value (N-th in order) from an archive block **bName** has been written into the archive database during the time when the archiving was unblocked. If not, it returns FALSE.

Declaration

```
IsArchUnBlock(DDEreference)
```

Parameters

DDEReference	DDE reference in the format D_2000 ARCH_STATUS!bName_N or cell address, which contains the reference.
--------------	---

Example

```
= IsArchUnBlock(D_2000|ARCH_STATUS!WB1_Blok2_10)
```
