

Total synchronization of databases

After selecting the item **Total synchronization of databases** in the menu **Databases** in program **D2000 CfgSynchro**, the following dialog window appears:

The window can be divided into five main parts:

| | |
|---|--|
| 1 | List of objects to copy. |
| 2 | Information on the progress of copying that is displayed in a similar way as in the Progress window. |
| 3 | Control panel |
| 4 | Tree structure of logical groups. |
| 5 | List of object types. |

Note: Before opening the window the copy request is automatically set according to the definition specified in the chapter [Synchronization - Complete database synchronization](#).
