

PulzB

%PulzB function

Function

Declaration

The function generates the impulse of optional length and polarity. The result is Boolean type.

```
BOOL %PulzB(  
    BOOL in StartTrigger,  
    BOOL in Polarity,  
    INT in Time,  
    UNIVAL in CalcTrigger  
)
```

Parameters	StartTrigger	Object, change of which into the TRUE state runs the impulse.
	Polarity	Generated impulse polarity.
	Time	Impulse duration [s].
	CalcTrigger	Object, which change causes recalculating the function. Its type is optional.
