

Ew

%Ew function

Old name	%EwR				
Function	The function returns the water enthalpy [kJ/kg]. Result is a real value.				
Declaration	REAL %Ew(REAL in p, REAL in t)				
Parameters	<table><tr><td>p</td><td>Water pressure [Mpa].</td></tr><tr><td>t</td><td>Water temperature [°C].</td></tr></table>	p	Water pressure [Mpa].	t	Water temperature [°C].
p	Water pressure [Mpa].				
t	Water temperature [°C].
