

Es

%Es function

Old name

%EsR

Function

The function returns the steam enthalpy [kJ/kg].
Result is a real value.

Declaration

```
REAL %Es(  
    REAL in p,  
    REAL in t  
)
```

Parameters

p	Steam pressure [Mpa]. Admissible value: $p > 0$ MPa.
t	Steam temperature [°C]. Admissible value: $t \leq 800$ °C.
