

AddTime

%AddTime function

Old name	%AddTimeT						
Function	The function adds the specified relative time TimeB to the specified absolute time TimeA . Result is an absolute time.						
Declaration	<pre>TIME %AddTime(TIME in TimeA, REAL in TimeB, INT in timeZone := %GetTimeZone())</pre>						
Parameters	<table><tr><td>TimeA</td><td>Absolute time.</td></tr><tr><td>TimeB</td><td>Relative time.</td></tr><tr><td>timeZone</td><td>Forced time zone to convert to a local time. It is set as a time zone offset from UTC during winter in seconds.</td></tr></table>	TimeA	Absolute time.	TimeB	Relative time.	timeZone	Forced time zone to convert to a local time. It is set as a time zone offset from UTC during winter in seconds.
TimeA	Absolute time.						
TimeB	Relative time.						
timeZone	Forced time zone to convert to a local time. It is set as a time zone offset from UTC during winter in seconds.						
Description	The function works as the function %AddIntervalLocal .						
Example	<pre>%AddTime(TM5, U.RTime6) %AddTime(TM5, %StrToRelTime("256 17:03:16"))</pre>
