

CNT_GETITEM

CNT_GETITEM action

Declaration	CNT_GETITEM _hContainer, _index, _value
-------------	---

Parameters	<u>_hContainer</u>	in	Identifier of <i>Int</i> type - data container.
	<u>_index</u>	in	Sequence number of item (from 1...) of the array created by the action CNT_CNVTOARRAY .
	<u>_value</u>	output	Value from the container, if the value of the parameter <i>_bFound</i> is @TRUE, otherwise the value of the parameter remains unchanged.

Description

The action reads the value of specified by its sequence number (the parameter *_index*) from the [data container](#) and returns the value in the parameter *_value*.

Analogous to the action [CNT_FIND](#), the parameter *_value* must be of proper type.

The parameter *_index* may be a value within the interval 1...*nr*, while *nr* is returned by calling the action [CNT_GETNR](#).

Note

The action [CNT_CNVTOARRAY](#) that creates an array for accessing the values of the container by means of index.

Example

[Work with data container \(actions CNT_...\).](#)
