

HI_UnRegKeyHandler

%HI_UnRegKeyHandler function

Function

Control function for unregistering keyboard shortcuts generating the [OnKeyDown](#) event.

Declaration

```
%HI_UnRegKeyHandler(    IN INT _VKCode, IN BOOL _bCtrl, IN BOOL _bShift, IN
                        BOOL _bAlt)
```

Parameters

_VKCode	Code of pressed key.
_bCtrl	Attribute of the CTRL key state when the key _VKCode is pressed.
_bShift	Attribute of the SHIFT key state when the key _VKCode is pressed.
_bAlt	Attribute of the ALT key state when the key _VKCode is pressed.

Description

The control function unregisters a keyboard shortcut, the pressing of which generates an OnKeyDown event.

Example

```
; Remove the shortcut ALT + a
%HI_UnRegKeyHandler(61, @FALSE, @FALSE, @TRUE)
```
