

Configuration of Application (Linux)

The file with configuration parameters of the application is located in

`<app_directory>/<app_name>/application.properties`

where `<app_directory>` is the app directory and `<app_name>` is the name of the application

The file is in text format, individual parameters are stored in the form `key = value`. The meaning of the parameters is described in the chapter [Parameters for D2000 Server](#).

The file's **application.properties** content corresponds to the key `[HKEY_LOCAL_MACHINE\SOFTWARE\pesoft\<instance_name>\cfg_APPL_NAME]`. The hierarchical (tree) structure of information is expressed by the delimiter '.' (period) in the key name.

application.properties

```
