HI_SetPictureBorderColor

%HI_SetPictureBorderColor function

Function

The function sets the picture's own border.

Declaration

```
%HI_SetPictureBorderColor(
   INT in color,
   INT in width
 )
```

Parameters

color	RGB color index
width	edge width, a value less than 1 cancels the edge drawing

Description

When the property is activated, a box is drawn around the picture in the picture space. The function is intended for pictures that do not have a border.

Note

The function %MakeRGB allows to form the color from individual color components.

Examples

```
; show picture border
%HI_SetPictureBorderColor(%MakeRGB(0,0,255),2)
; hide picture border
%HI_SetPictureBorderColor(%MakeRGB(0,0,0),0)
```

Requirements

Minimum supported version	D2000 V12.7N
