

JSON_ArrayAppendValue

%JSON_ArrayAppendValue function

Funkcia

Appends a new value at the end of the JSON array.

Deklarácia

```
%JSON_ArrayAppendValue(  
    INT in handle  
    UNIVAL in value  
)
```

Parametre

handle	Handle to the JSON array
value	Value to be appended

Návratová hodnota

None.

Popis

The function appends a new value at the end of the specified JSON array. Supported types are INT, REAL, BOOL and TEXT. If you need to save a TIME value, you must first convert it to TEXT and then paste it.

An exception is thrown if the value type is unsupported or the handle on the JSON array is invalid.

Príklad

```
INT _arr  
_arr := %JSON_CreateArray()  
  
%JSON_ArrayAppendValue(_arr, "IPESOFT")  
%JSON_ArrayAppendValue(_arr, 365)  
%JSON_ArrayAppendValue(_arr, 1.234)  
%JSON_ArrayAppendValue(_arr, @TRUE)  
%JSON_ArrayAppendValue(_arr, U.uservariable)  
  
%JSON_FreeArrayHandle(_arr)
```
