

JSON_ArrayGetLength

%JSON_ArrayGetLength function

Function Returns the number (gets length) of elements in a JSON array.

Declaration

```
INT %JSON_ArrayGetLength(  
    INT in handle  
)
```

Parameters

handle	Handle to JSON array.
---------------	-----------------------

Return value The number of items in a JSON array.

Description The function returns the number of elements in the specified JSON array.

If the handle on the JSON array is invalid, an exception is thrown.

Example

```
INT _arr  
_arr := %JSON_ArrayFromString('[[1,2,3],[4,5,6]]')  
  
INT _length  
_length := %JSON_ArrayGetLength(_arr)  
  
%JSON_FreeArrayHandle(_arr)
```
