

JSON_ObjectGetFieldsCount

%JSON_ObjectGetFieldsCount function

Function

Gets fields count in the JSON object.

Declaration

```
INT %JSON_ObjectGetFieldsCount(  
    INT in handle  
)
```

Parameters

handle	Handle to JSON object.
---------------	------------------------

Return value

Fields count in the JSON object

Description

Function gets fields count in the JSON object.

Exception is thrown if handle to the JSON object is invalid.

Example

```
INT _obj  
_obj := %JSON_ObjectFromString('{ "1": "A", "2": "B" }')  
  
INT _count  
_count := %JSON_ObjectGetFieldsCount(_obj)  
  
%JSON_FreeObjectHandle(_obj)
```
