

MaxR

%MaxR function

Function

The function returns the maximal value of specified arguments *Arg*, *Arg2*, ... *ArgN*. The number of arguments is not limited. The result is a real value.

Declaration

```
REAL %MaxR(  
    REAL in Arg1,  
    REAL in Arg2,  
    ...  
    REAL in ArgN  
)
```

Parameters

ArgX	Function argument.
