

Chr

%Chr function

Function

The function converts the specified number to a text (ASCII coding).

Declaration

```
TEXT %Chr(  
    INT in number  
)
```

Parameters

number	A number within the interval 0...255.
---------------	---------------------------------------

Example

If the value of the expression *number* is out of the limits, the function returns an invalid value.

```
%Chr(72)    ; returns the value of "H"
```
