

# OnNavHistoryPopState Picture Event

## Declaration

```
ENTRY OnNavHistoryPopState(IN TEXT _objState, IN TEXT _urlState)
; actions
END OnNavHistoryPopState
```

## Parameters

_objState	Contains value of 'objState' parameter saved by the functions %HI_NavHistoryPushState resp. %HI_NavHistoryReplaceState
_urlState	Contains value of 'urlState' parameter saved by the functions %HI_NavHistoryPushState resp. %HI_NavHistoryReplaceState

## Description

The event is triggered using the forward/reverse buttons in the web browser. Based on the **objState** resp. **urlState** values it is possible to set user interface into the saved state.
