

CNT_GETKEY

CNT_GETKEY action

Declaration

```
CNT_GETKEY _hContainer, _index, _key
```

Parameters

_hContainer	in	Unique identifier of <i>Int</i> type - data container.
_index	in	Consecutive number of an item (from 1...) of array that was created by CNT_CNVTO ARRAY .
_key	out	Value of the key from a container.

Description

The action reads the key item value from a [data container](#), which is defined by its serial number (the *_index* parameter) and inserts it into the *_key* parameter.
The *_key* parameter must be of the appropriate type.
The *_index* parameter may be a value in the range 1...*nr*. Parameter *nr* may be acquired by calling [CNT_GETNR](#).

Example

[Work with data container \(the actions CNT_...\).](#)
