CNT_CREATE

CNT_CREATE action

Declaration	
	```CNT_CREATE _hContainer [CASE_SENSITIVE]```

Parameters

_hContainer	out	Identifier of *Int* type - data container.

Description

The action creates an empty data container. The owner of the container is running instance of the script. The container cannot be shared by other scripts.
The keyword CASE_SENSITIVE ensures the comparison of the keys of inserted items based on differentiation of lowercase and uppercase letters. It is used only for the keys of *Text* type.
The container is terminated by termination of the script or by execution of the action CNT_DESTROY.

Example

Work with data container (actions CNT_...).
