

States (Values)

States (values) of processes

All possible states of objects of **Process** type are listed in the table.

Object status	Meaning
Run	Process is running.
Crash*	Process is crashed (incorrect termination).
Stop	Process run was correctly terminated.
WDErr*	Error during the communication with process D2000 Server - Watch Dog Error (interrupted flow of Watch Dog messages between process and D2000 Server).

*If the option **Autostart** is checked in the configuration of object of [Process](#) type, [D2000 Server](#) is attempting to restart process.
