

# License description

## License

The option **License** is available from a particular process ([D2000 CNF](#), [D2000 GrEditor](#), [D2000 HI](#)) - menu **Help** -> **License**.

The individual items show the range and status of the license. The license range depends on the level of the D2000 Product, which a customer had purchased. We provide three basic levels:

- **D2000 Basic**
- **D2000 Standard**
- **D2000 Enterprise**

You can find detailed information about the parameters and products in the chapter [License range](#).
