

Updating the D2000 HTML Help Viewer

Internet is the basic means to update the D2000 HTML help viewer. You can always download the newest version of the viewer.

To update the D2000 help viewer via Internet proceed as follows

- If your computer is currently connected to the Internet click [here](#).
- If it is not, you can download the newest version via your Internet browser anytime, as follows:
 1. Run your Internet browser.
 2. Type the URL address www.ipesoft.sk
 3. In the displayed menu located on the right side, click **Support** button
 4. On internet page click "D2000 RELEASES".
 5. Enter your name and password, then click **RELEASES**.
 6. In the list (part **Online documentation**) click on the required version of the documentation.
 7. Click on the documentation file icon (.chm).
