

OnDynamicGraph

OnDynamicGraph picture event

Declaration	<pre>ENTRY OnDynamicGraph(IN ALIAS _hobj, IN INT _row, IN INT _col, BOOL _bProcessed) ; actions END OnDynamicGraph</pre>						
Parameters	<table><tr><td>_hobj</td><td>Reference to an object the user wants to open a dynamic graph of which.</td></tr><tr><td>_row, _col</td><td>Row and column - must be defined if the user opens a dynamic graph of an item of object of Structured variable.</td></tr><tr><td>_bProcessed</td><td>Output parameter - informs the D2000 HI process whether it opens a dynamic graph or not. Possible values:<ul style="list-style-type: none">• @TRUE - process D2000 HI doesn't open a dynamic graph at all• @FALSE - process D2000 HI opens a dynamic graph</td></tr></table>	_hobj	Reference to an object the user wants to open a dynamic graph of which.	_row, _col	Row and column - must be defined if the user opens a dynamic graph of an item of object of Structured variable .	_bProcessed	Output parameter - informs the D2000 HI process whether it opens a dynamic graph or not. Possible values: <ul style="list-style-type: none">• @TRUE - process D2000 HI doesn't open a dynamic graph at all• @FALSE - process D2000 HI opens a dynamic graph
_hobj	Reference to an object the user wants to open a dynamic graph of which.						
_row, _col	Row and column - must be defined if the user opens a dynamic graph of an item of object of Structured variable .						
_bProcessed	Output parameter - informs the D2000 HI process whether it opens a dynamic graph or not. Possible values: <ul style="list-style-type: none">• @TRUE - process D2000 HI doesn't open a dynamic graph at all• @FALSE - process D2000 HI opens a dynamic graph						
Description	<p>The event is being generated if the user clicks the button to open a dynamic graph from a control /information window opened from picture.</p> <p>If such a picture event is defined in the script of that picture, the D2000 HI process opens a dynamic graph only when the value of the parameter <i>_bProcessed</i> is @FALSE. Otherwise (the value of @TRUE), the reaction to clicking the button must be handled in the script of that picture.</p>
