

OnLogOn

OnLogOn picture event

Declaration

```
ENTRY OnLogOn(IN TEXT _userName, IN BOOL _bLogOn)
; actions
END OnLogOn
```

Parameters

_userName	Required input parameter. Name of the logged on/logged off user.
_bLogOn	Required input parameter.

Description

This entry is activated by a graphic picture after logging on/logging off the user. If the logged on user is changing, first, the entry to log off the current user is generated and then the entry to log on the new user. It is generated only for the graphic pictures that do not close when the user logs off. The parameter *_userName* contains a text string that represents the name of logged on/logged off user.

The parameter *_bLogOn* acquires the value:

- @TRUE - if the user was logged on
- @FALSE - if the user was logged off
