

HI_EnableHI

%HI_EnableHI function

Function

The function enables/disables working with the [D2000 HI](#) process ([control function](#)).

Declaration

```
%HI_EnableHI(  
    BOOL in bEnable  
)
```

Parameters

bEnable	@TRUE - enables working with the D2000 HI process. @FALSE - disables working with the D2000 HI process.
----------------	--

Note

If the value of the parameter *bEnable* is @FALSE working with the [D2000 HI](#) process is disabled.
