

# HI\_CloseRow

## %HI\_CloseRow function

|             |                                                                                                                                                                                                                                                                                                                                                            |  |             |                                                                          |       |                          |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|-------------|--------------------------------------------------------------------------|-------|--------------------------|
| Function    | The function terminates updating of the row values of the object of Structured variable ( <a href="#">Control function</a> ).                                                                                                                                                                                                                              |  |             |                                                                          |       |                          |
| Declaration | <pre>INT %HI_CloseRow(<br/>    HBJ in refToStruct,<br/>    INT in index<br/>)</pre>                                                                                                                                                                                                                                                                        |  |             |                                                                          |       |                          |
| Parameters  | <table><tr><td>refToStruct</td><td>Reference to the object of the <a href="#">Structured variable</a> type.</td></tr><tr><td>index</td><td>Structured variable row.</td></tr></table>                                                                                                                                                                      |  | refToStruct | Reference to the object of the <a href="#">Structured variable</a> type. | index | Structured variable row. |
| refToStruct | Reference to the object of the <a href="#">Structured variable</a> type.                                                                                                                                                                                                                                                                                   |  |             |                                                                          |       |                          |
| index       | Structured variable row.                                                                                                                                                                                                                                                                                                                                   |  |             |                                                                          |       |                          |
| Description | The function terminates updating the values of the structured variable row defined by the parameter <i>index</i> . The structured variable is defined by the parameter <i>refToStruct</i> of HBJ type (for example: <a href="#">SV.Structure\HBJ</a> ). Value of the parameter <i>index</i> is not checked because of the size of the structured variable. |  |             |                                                                          |       |                          |
| Example     | Termination of updating the values of the row 5 of the structured variable <i>SV.Structure</i> :<br><pre>_retCode := %HI_CloseRow(SV.Structure\HBJ, 5)</pre>                                                                                                                                                                                               |  |             |                                                                          |       |                          |
