

HI_Beep

%HI_Beep function

Function

The function **%HI_Beep** sounds the tone of the specified frequency and duration through the computer's speaker ([control function](#)).

Declaration

```
%HI_Beep(  
    INT in freq,  
    INT in duration  
)
```

Parameters

freq	Tone frequency within the interval 377 up to 32767 Hz.
duration	Tone duration within the interval 0 up to 1000 ms.

Note

The function is synchronous, so it stops the execution of script actions for the time defined in the parameter *duration* [ms].
