

# HI\_GetBrowserAutoRefresh

## %HI\_SetBrowserAutoRefresh, %HI\_GetBrowserAutoRefresh functions

**Function** The function **%HI\_SetBrowserAutoRefresh** enables/disables auto refresh in displayer of [Browser](#) type (control function), if the object [Table](#) is connected to it.

**Declaration** The function **%HI\_GetBrowserAutoRefresh** returns the setting of auto refresh in [Browser](#) displayer.

```
%HI_SetBrowserAutoRefresh(  
    INT in refId,  
    BOOL in autorefresh  
)  
  
BOOL %HI_GetBrowserAutoRefresh(  
    INT in refId  
)
```

**Parameters**

<b>refid</b>	Reference to displayer ( <a href="#">reference variable</a> ).
<b>autorefresh</b>	The value of displayer. TRUE - auto refresh enabled, FALSE - auto refresh disabled.

**Note** It relates only to **Browser** displayer with the connected **Table**.
