HI_SetPaintEffects (Active Picture Manipulation Functions)

%HI_GetPaintEffects, %HI_SetPaintEffects functions

Function

The function **%HI_SetPaintEffects** sets a gradient effect defined in the Object properties palette - tab **Effects** for a graphic object or picture (control function).

The function **%HI_GetPaintEffects** gets a gradient effect (enable/disable).

Declaration

```
%HI_SetPaintEffects(
   INT in refId,
   BOOL in bEnable
 )

 BOOL %HI_GetPaintEffects(
   INT in refId
 )
```

Parameters

refId	Reference to graphic object (reference variable) or picture (if *RefId*=0).
bEnable	Enables/disables a gradient effect.
