

HI_EditTreeViewItem

%HI_EditTreeViewItem function

Function

The function starts editing of text item in a graphic object [TreeView](#).

Declaration

```
%HI_EditTreeViewItem(  
    INT in refId,  
    INT in itemHandle  
)
```

Parameters

refId	Reference to TreeView graphic object (reference variable).
itemHandle	Handle to the item in TreeView which will be changed.

Description

The function starts editing of item which was defined by *_itemHandle*. The graphic object of TreeView type is defined by *_refid*. After calling this function to TreeView object, the item may be edited. After editing, the event [OnTreeItemChange](#) will be triggered.
