

# HI\_DeleteItem

## %HI\_DeleteItem function

### Function

The function **%HI\_DeleteItem** deletes the specified item of the Windows control of [Tree view type \(Control function\)](#).

### Declaration

```
%HI_DeleteItem(  
    INT in refId  
    [, INT in itemIdx],  
    BOOL in bOnlyChilds  
)
```

### Parameters

<b>refId</b>	Reference to graphic object ( <a href="#">reference variable</a> ).
<b>itemIdx</b>	<a href="#">Unique identifier</a> of the item.
<b>bOnlyChild</b>	Deleting all subitems only. If the value is: <ul style="list-style-type: none"><li>• @TRUE - delete all subitems</li></ul>

### Description

The function deletes the tree view item given by the parameter *itemIdx* (from 1 ...), or currently selected item, if the parameter is not entered.
