

XML_CopyDocument

%XML_CopyDocument function

Function

The function creates a copy of an XML document.

Declaration

```
INT %XML_CopyDocument(  
    INT in docHandle  
)
```

Parameters

docHandle	Handle to the new open XML document.
------------------	--------------------------------------

Return value

Handle to the new open XML document which is a copy of specific XML document. If an error occurs, the return value is invalid.

Description

The function creates a copy of XML document.

Example

```
INT _docOrg  
INT _docCpy  
  
BOOL _freeOrgOk  
BOOL _freeCpyOk  
  
_docOrg := %XML_ExportD2ObjToDocument(12704, "zero_hobj=off exp_logs=on")  
_docCpy := %XML_CopyDocument (_docOrg)  
  
;work with copy  
  
_freeOrgOk := %XML_FreeDocument(_docOrg)  
_freeCpyOk := %XML_FreeDocument(_docCpy)
```
