

# XML\_GetLastErrorMessage

## %XML\_GetLastErrorMessage function

**Function**

The function returns the text description of the last XML operation success.

**Declaration**

```
TEXT %XML_GetLastErrorMessage( )
```

**Parameters**

None.

**Return value**

Error text.

**Description**

The function returns the text description of the XML operation success. If no error occurred (ErrorCode = 0), the function returns empty text.

**Example**

```
TEXT _errorMsg
 errorMsg := %XML_GetLastErrorMessage( )
```
