

XML_FreeGrammar

%XML_FreeGrammar function

Function

The function releases XSD grammar from a memory.

Declaration

```
BOOL %XML_FreeGrammar(  
    INT in grammar  
)
```

Parameters

grammar	Handle to XSD grammar.
----------------	------------------------

Return value

@TRUE - the function was done successfully
@FALSE - the function failed

Description

After finishing the work with XSD grammar, its instance must be released from the memory by calling this function.

Example

```
BOOL _bFree  
_bFree := %XML_FreeGrammar(_grammar)
```
