

XML_AddCDataNode

%XML_AddCDataNode function

Function

The function adds a new CDATA XML element.

Declaration

```
INT %XML_AddCDataNode(
    INT in node,
    TEXT in CDATA
)
```

Parameters

node	Handle to parent XML node.
CDATA	CDATA of new element.

Return value

Handle to the added XML element.

Description

The function adds defined CDATA to the given parent XML node. Parent node can be an element.

Example

```
INT _doc
_doc := %XML_CreateDocument()
INT _el
_el := %XML_AddElement(_doc, "element")
INT _txt
_txt := %XML_AddCDataNode(_el, "fjdkfjgwjljl")
```
