

Create a New Logical Group

Creating a new logical group

To create a new logical group, follow the procedure:

1. Open the [selection window](#) in the [D2000 CNF](#) process.
2. In the list of objects, types select the type  **Logical group**.
3. In the list of objects select a logical group you want to use as a template.
4. Click the button  - **New object**.
5. Type the name of the new logical in the [dialog box to create a new object](#).
6. In the [configuration dialog box](#) set parameters of the logical group.

Note: Steps 2 and 3 are optional.
